

Products & Services 2022

ABOUT US

SCB Group is the world's leading low carbon commodity company, relentlessly pursuing a low carbon future.

**“Top rated
biofuel broker.”**

THE WALL STREET JOURNAL

**“Biofuel and Ag brokerage
moving into the
battery material sector.”**

**“Leading experts in
the renewable market.”**

Bloomberg

**“Financial brokers with an
environmentalist edge.”**

Irish Independent

**“World's largest renewable
energy brokerage firm.”**

OUR PURPOSE

01

Mission

SCB is a global low carbon commodity firm whose mission is to promote the adoption of a low carbon future.

02

Goals

Provide outstanding services in:

- Brokerage
- Climate Solutions
- Market Data

For these markets but not limited to: biofuels, agriculture, battery materials, methanol and carbon.

03

Strategy

As market professionals, we promote the adoption of a low carbon future alternatives by reducing the frictional cost of low carbon practices. Working with our clients and partners, we create markets, develop hedging tools and provide price transparency.

OUR IMPACT

At SCB, our commitment to a low carbon future is at the forefront of our approach to business. Fuelled by knowledge, we have assisted in transactions that have abated in excess of 500 million metric tonnes of CO₂, and this is just the beginning!

**500 MILLION
METRIC TONNES
OF CO₂ ABATED**

through SCB transactions in Europe,
Asia, Africa, and the Americas.

**547.5 BILLION
POUNDS OF COAL
DISPLACED**

partly through partnerships
with utilities and businesses
in electrical generation.

**587.5 MILLION
TREES GROWN
IN ONE YEAR**

assisted by the abatement of
CO₂ emissions from working
with partners specializing
in environmental causes.

**4 MILLION
ACRES OF FORESTS
PRESERVED**

from conversion to cropland
in one year as we continue
to work with partners
in the farming industry.

SUSTAINABILITY

As leading promoters of a low carbon future, we are a carbon-neutral business since 2021. By becoming carbon neutral, we advance towards our mission and our Net Zero commitment by 2030.

Along with its carbon neutral and net zero goals, SCB supports and implements the TCFD Recommendations enabling it to measure and evaluate more effectively its risks and those of its suppliers and competitors. In addition, all five SCB entities are ISO 14001 Certified setting up the requirements for an environmental management. Aside from our environmental impact, we are committed to using business as a force for good. As a B Corp™, we meet the highest standards for social and environmental performance, accountability and transparency.

SERVICES OVERVIEW

Brokerage

For over 15 years, our offices in Nyon, London, Singapore, Chicago and Puerto Rico, have offered brokerage solutions by using derivatives to provide 24/7 hedging tools against potential risk, as well as assisting the sourcing or placement of physical product and credits.

Matched Principal

In the regulated and voluntary emissions reduction markets, we provide execution, portfolio management and advisory services. In a space with many categories and technologies, we offer a roadmap for our partners to achieve their sustainability and financial goals.

Advisory

With almost two decades of experience in environmental commodities, we have launched an advisory arm to help our partners deal with the many facets of climate change. Alongside a vast array of environmental services, SCB Advisory focuses on helping our partners in the areas of GHG management, renewable energy consulting, and environmental reporting.

Market Data

SCB Data is a leading provider of independent, end-of-day and real-time price information in the low carbon commodity market. We provide unbiased marks that help to promote market transparency, reduce risk and allow both new and existing participants to analyse these markets.

BROKERAGE SERVICES

For over 15 years, our offices in Nyon, London, Singapore, Chicago and Puerto Rico, have offered brokerage solutions by using derivatives to provide 24/7 hedging tools against potential risk, as well as assisting the sourcing or placement of physical product and credits.

Our expertise transcends simply introducing buyers and sellers. In many cases, we help with contract discussions for complex products. We offer price transparency and market liquidity to all parties' while always maintaining confidentiality.

Many of our solutions consist of using derivatives to provide hedging against obvious and not so obvious risks in accordance with the market participants overall exposure.

MATCHED PRINCIPAL SERVICES

In the regulated and voluntary emissions reduction markets, we provide execution, portfolio management and advisory services. In a space with many categories and technologies, we offer a roadmap for our partners to achieve their sustainability and financial goals.

Universally, there is pressure on companies to prove commitment to sustainability and implement emission-reducing measures. This has led to incentives for producers of energy to invest capital into renewable energy projects. We provide advisory services to help companies reduce their carbon footprint by measuring, reporting and abating their emissions.

We help companies, organizations and groups of all kinds to reduce their carbon footprint. We provide various types of Energy Attribute Certificates, such as GOs, REGOs, RECs & I-RECs. We also work closely with renewable assets owners helping them to find the best route to the market for their renewable energy certificates.

ADVISORY SERVICES

With almost two decades of experience in environmental commodities, our advisory arm assists partners deal with the many facets of climate change. Alongside a vast array of environmental services, SCB Advisory focuses on helping our partners in the areas of ESG Finance, GHG management, renewable energy consulting, and environmental reporting.

There has been a fundamental shift in investment approach and, therefore, capital raising, with increased attention on the Environmental, Social and Governance aspect of a business (ESG).

SCB Advisory offers its partners advice and assistance on how to measure and mitigate the risks within the increasingly carbon focused business and political environment. We do this through assessing the impact of GHG emissions, setting reduction goals and offering tailored solutions using a variety of tools, including but not limited to: environmental attribute and carbon offset procurement, PPAs, offtake agreements and personalised carbon modelling.

MARKET DATA SERVICES

SCB Data is a leading provider of independent, end-of-day and real-time price information in the low carbon commodity market. We provide unbiased marks that help to promote market transparency, reduce risk and allow both new and existing participants to analyze these markets.

We collect real-time data from our broking and Matched Principal Carbon desks and aggregate it into high-quality, accurate and timely information. Our clients use our marks for risk and compliance management, market analysis, contract benchmarking and portfolio investment.

We deliver data using various technologies and platforms including Bloomberg, Reuters and TP ICAP. We also partner with major data vendors to make the information as accessible as possible. Our datasets are available on subscription via the RENW function on Bloomberg, and through TPI. We can also tailor bespoke datasets upon request for electronic delivery.

OUR MARKETS

Biodiesel

As a market leader in biodiesel brokerage, we were an early entrant into the market. With activities focused on the brokering of physical biofuels in line with the EU and US implementation mandates. We have a strong market position, assisting producers, traders and end-users to manage and mitigate their biodiesel risk and exposure along the forward curve for both physical and derivative products. Within the biodiesel sector we have increased price transparency and lowered the frictional cost of adoption.

Ethanol

Energetically brokering in the ethanol market for over 13 years, we have developed an international customer base, including the USA's and Europe's largest producers, most active consumers and traders. Assisting the development of the fuel ethanol markets, we have a strong focus on the hub markets for both future and physical products, such as Rotterdam in Europe, and Chicago in the USA. As ethanol brokerage experts, we played an integral role in bringing to market future and option contracts that are live on CME and ICE for US and European Ethanol.

Wastes

For the past eight years we've been covering a range of waste products within the feedstock market for biodiesel production and lubricants. We have established a diverse client pool of suppliers, traders, blenders and end-users. Wastes are one of the greatest opportunities to promote a low carbon future. The products we broker include used cooking oil, palm oil mill effluent, acid oils, brown/trap grease and waste lubricant oil. Catering to such diversity allows us to provide accurate and invaluable market information.

OUR MARKETS

Methanol

Methanol is a feedstock for biodiesel production. We began broking methanol through our expansive global biodiesel network who use methanol as a feedstock. We entered the market seeing the vital need for a hedging instrument and facilitated the launch of methanol futures instruments in Europe, Asia and the US. We are now the market leaders for derivative trading in methanol and equally large presence in physical trading in global methanol markets.

Agriculture

With almost two decades of experience, SCB's Agriculture platform has rapidly built a reputation for innovation and has become a leading player in multiple global markets. The team has recently launched multiple cleared and OTC swaps and future products. Of note are Black Sea Wheat/Corn, Ukrainian Sunflower Oil, Brazilian Soybeans Swaps and most recently Rice Swaps. As the global agriculture markets grow increasingly complex and interconnected, a flexible and agile partner is needed. SCB Agriculture desks are dedicated to developing new markets. We constantly look to improve risk transfer, price discovery and transparency in opaque and difficult to access markets.

Vegetable Oils

Established in 2012, our Vegetable Oil desks have acquired an in-depth understanding of the futures and physical markets. Our brokers have over 25 years' market experience and are active on all of vegetable oils market. We broke futures and blocks. Years within the industry have given us deep insight and wide experience, enabling us to provide our clients both physical and fundamental market information.

OUR MARKETS

Battery Materials

Our mission is to promote the adoption of a low carbon future. The increasing uptake of electric vehicles in tandem with continuously improving EV battery efficiency will ultimately result in global carbon emission reduction. The battery materials market is aligned with SCB's corporate mission. Having worked with electric vehicle manufacturers through our involvement in the US LCFS ticket market, we saw a growing interest from companies seeking hedging mechanisms to protect their exposure in battery materials markets including cobalt, lithium, nickel and their derivative components.

Biomethane

In the past six years, the market for biomethane has exhibited significant growth as EU initiatives strive to reach emissions targets. The potential for biomethane to help achieve these targets is strong. At SCB, we work with our partners to provide a secure and sustainable source of income through the use of Certificate Purchase Agreements (CPAs). This helps to manage price-risk and minimize transaction costs. Through our knowledge and experience, we offer guidance in the accreditation process and relevant regulatory requirements.

Verified Emission Reduction (VERs)

Verified emission reductions are commonly known as carbon offsets, carbon credits, or carbon offset credits. Verified emission reductions (VERs) are essentially a reduction in greenhouse gas emissions (GHGs) from a project that is independently audited (i.e., verified) against a third-party certification standard. We offer a whole range of voluntary carbon offset certificates according to the best standards. If you have long term plans, or need customization, on carbon offset procurement we can also arrange Emission Reductions Purchase Agreements (ERPA).

OUR MARKETS

Power Carbon Reduction Services- EACs

We help companies, organizations and groups of all kinds to reduce their carbon footprint by providing various types of Energy Attribute Certificates. These EAC's include but are not limited to GOs, REGOs, RECs & I-RECs. In addition, we also work closely with renewable assets owners to advise them on the best route to the market for their renewable energy certificates.

Fuel and Emissions Credit

Our experience and knowledge in the physical and financial biofuel markets gives us a unique position to assist our clients in their relevant national transport fuel credit markets. We facilitate end-users, distributors, and obligated parties in credit markets to cover their commitments, monetize their credit assets, devise bespoke risk management strategies and navigate the dynamic market landscape through our execution services and extensive market knowledge.

OUR CULTURE

We Are:

Relentless - In it for the long haul, we are a successful environmental business with big things on our minds, and an endless passion to do more. We don't just tick boxes; we aim and continually attack challenges with enthusiasm.

Enterprising - Eyes on the horizon, we see the opportunities. Never afraid to embrace creative solutions, we are leading the charge for cultural change on a global scale.

Expertise - Low carbon energy is our business, not a bolt-on service. As early adopters, we've been doing this for a long time. Reduced costs? Less risk? Increased liquidity? Or regulatory change? On a human and technological level, we know-how.

Connected - We don't bluff internationalism: our business has a genuine global reach. Wherever our customers are in the world, the values and service they receive don't change.

Integrity - True to our principles, we never deviate from the focused vision. Open and fair, we set out to do the right thing to achieve our mission.

From leading Antarctic and North Pole expeditions, to helping our partners become carbon neutral, our relentless energy is focused on a better future for every global citizen.
