Nyon

Independent practitioner's limited assurance report on the CO₂ emissions abatement calculation presented in metric tonnes of CO₂ based on transactions executed by SCB Group and on the CO₂ emissions abatement calculation for passenger cars, pet cats & dogs, individuals & employees and the carbon offsetting for passenger cars of "ClimatePositive"

to the Board of Directors

Independent practitioner's limited assurance report

on the CO₂ emissions abatement calculation presented in metric tonnes of CO₂ based on transactions executed by SCB Group and on the CO₂ emissions abatement calculation for passenger cars, pet cats & dogs, individuals & employees and the carbon offsetting for passenger cars of “ClimatePositive” to the Board of Directors of SCB Brokers SA

Nyon, Switzerland

We have been engaged by Board of Directors to perform assurance procedures to provide limited assurance for two CO₂ emissions abatement calculations in accordance with the suitable Criteria and presented on the SCB Group websites.

Subject to our assurance engagement are:

- a) the CO₂ emissions abatement calculation presented in metric tonnes of CO₂ based on transactions executed by SCB Group on the SCB Group's website ⁽¹⁾ <https://starcb.com/impact/carbon-impact/> for the period from 1 January 2021 until 31 December 2021, and
- b) the CO₂ emissions abatement calculation for passenger cars, pet cats & dogs, individuals & employees and the carbon offsetting for passenger cars disclosed on the ClimatePositive's (a brand of SCB Group) website ⁽¹⁾ <https://climatepositive.com/>.

Both subject matters will be marked with 'PwC CH' on the relevant SCB Group's websites ⁽¹⁾. SCB Group is comprised of SCB Brokers SA, SCB Derivatives LLC, SCB Brokers LLC, SCB & Associates Ltd, and SCB & Associates PTE Ltd.

The presented CO₂ emissions abatement calculation based on transactions executed by SCB Group and the presented CO₂ emissions abatement calculation for passenger cars, pet cats & dogs, individuals & employees and the carbon offsetting for passenger cars for ClimatePositive are based on the criteria included in the SCB Group's guideline "Basis of Preparation document" dated 27 October 2022 (the "suitable Criteria").

Inherent limitations

The accuracy and completeness of both subject matters disclosed on the related SCB Group's websites ⁽¹⁾ are subject to inherent limitations given their nature and methods for determining, calculating and estimating such data. In addition, the quantification of the CO₂ emissions abatement calculations for both subject matters disclosed on the related SCB Group's websites ⁽¹⁾ is subject to inherent uncertainty because of incomplete scientific knowledge used to determine factors related to the CO₂ emissions abatement calculations for both subject matters and the values needed to combine e.g. emissions of different gases. Our assurance report will therefore have to be read in connection with the suitable Criteria used by SCB Group, its definitions, and procedures in the document "Basis of Preparation".

Management's responsibility

The Management of SCB Brokers SA is responsible for preparing the CO₂ emissions abatement calculations for both subject matters in accordance with the "Basis of Preparation" document disclosed on the related SCB Group's websites ⁽¹⁾. This responsibility includes the design, implementation and maintenance of the internal control system related to the preparation of the CO₂ emissions abatement calculations for both subject matters disclosed on the related SCB

PricewaterhouseCoopers AG, Birchstrasse 160, Postfach, CH-8050 Zürich, Switzerland
Telefon: +41 58 792 44 00, www.pwc.ch

Group's websites ⁽¹⁾ that are free from material misstatement, whether due to fraud or error. Furthermore, the Management is responsible for the selection and application of the "Basis of Preparation" document and adequate record keeping.

Independence and quality control

We are independent of the SCB Brokers SA in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code). We have fulfilled our other ethical responsibilities in accordance with the IESBA Code, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

PricewaterhouseCoopers AG applies International Standard on Quality Control 1 and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Practitioner's responsibility

Our responsibility is to perform an assurance limited engagement and to express a conclusion on the CO₂ emissions abatement calculations for both subject matters disclosed on the related SCB Group's websites ⁽¹⁾. We conducted our engagement in accordance with the International Standard on Assurance Engagements (ISAE) 3000 (Revised) 'Assurance engagements other than audits or reviews of historical financial information' and, in respect of the greenhouse gas emissions, in accordance with International Standard on Assurance Engagements (ISAE) 3410 "Assurance engagements on greenhouse gas statements", issued by the International Auditing and Assurance Standards Board. Those standards require that we plan and perform our procedures to obtain limited assurance whether anything has come to our attention that causes us to believe that the CO₂ emissions abatement calculations for both subject matters disclosed on the related SCB Group's websites ⁽¹⁾ and marked with the label 'PwC CH' were not prepared, in all material aspects, in accordance with the "Basis of Preparation" document.

Based on risk and materiality considerations, we performed our procedures to obtain sufficient and appropriate assurance evidence. The procedures selected depend on the assurance practitioner's judgement. A limited assurance engagement under ISAE 3000 (Revised) and ISAE 3410 is substantially less in scope than a reasonable assurance engagement in relation to both the risk assessment procedures, including an understanding of internal control, and the procedures performed in response to the assessed risks. Consequently, the nature, timing and extent of procedures for gathering sufficient appropriate evidence are deliberately limited relative to a reasonable assurance engagement and therefore less assurance is obtained with a limited assurance engagement than for a reasonable assurance engagement.

We performed the following procedures, amongst others:

- **Management Inquiry:**
Interviewing management and personnel responsible for internal non-financial reporting and data collection at the Company to determine the understanding and application of the SCB Group's guideline "Basis of Preparation" used as a basis of the CO₂ emissions abatement calculations for both subject matters disclosed on the related SCB Group's websites ⁽¹⁾ <https://starcb.com/impact/carbon-impact/> and <https://climatepositive.com/>, respectively;
- **Review of the relevant guideline used for both Subject Matters:**
On a sample basis we have tested the accuracy of the Greenhouse Gas (GHG) Reduction Rate published by the European Union's Renewable Energy Directive (RED), the Low Carbon Fuel Standards (LCFS) program and the Green Houses Gases Equivalencies used for the CO₂ emissions abatement calculation based on transactions executed by SCB Group on the related [SCB Group's website](#) ⁽¹⁾. Additionally, we have tested on a sample basis the accuracy of the variables used for CO₂ emitted from passenger cars (electric and regular cars), pet cats & dogs, individuals & employees and the carbon offsetting for passenger cars disclosed on the [ClimatePositive website](#) ⁽¹⁾.
- **Assessment of the processes and data consolidation:**
Performing completeness and accuracy tests over the transactional data used to calculate the CO₂ Emissions Abatement disclosed on the [SCB Group's website](#) and marked with the label 'PwC CH'.

- *Calculation of the abatement on ClimatePositive website:*
We have tested the accuracy of the variable used for CO₂ emission abatement for passenger cars on the [ClimatePositive website](#) for a sample of defined user cases, for European, U.S. and Rest of the World passenger cars. In addition, we tested the accuracy of the variable used for CO₂ emitted from pet cats & dogs, individuals & employees and the carbon offsetting for passenger cars following the calculation as outlined in ClimatePositive's guideline "Basis of Preparation" and marked with the label '☑ PwC CH'.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

Conclusion

Based on the work we performed, nothing has come to our attention that causes us to believe that:

- a) the CO₂ emissions abatement calculations presented in metric tonnes of CO₂ based on transactions executed by SCB Group on the SCB Group's website <https://starcb.com/impact/carbon-impact/> ⁽¹⁾ for the period from 1 January 2021 until 31 December 2021, and
- b) on the CO₂ emissions abatement calculations for passenger cars, pet cats & dogs, individuals & employees and the carbon offsetting for passenger cars disclosed on the ClimatePositive's (a brand of SCB Group) website <https://climatepositive.com/> ⁽¹⁾

and marked with the label '☑ PwC CH' as per date of this report is not prepared, in all material respects, in accordance with SCB Group's guideline "Basis of Preparation".

Intended users and purpose of the report

This report is prepared for, and only for, the Board of Directors of SCB Brokers SA, and solely for the purpose of reporting to them on CO₂ emissions abatement calculations and no other purpose. We do not, in giving our conclusion, accept or assume responsibility (legal or otherwise) or accept liability for, or in connection with, any other purpose for which our report including the conclusion may be used, or to any other person to whom our report is shown or into whose hands it may come, and no other persons shall be entitled to rely on our conclusion.

We permit the disclosure of our report, in full only and in combination with the SCB Group's guideline "Basis of Preparation" (suitable Criteria), to enable the Management to demonstrate that they have evidenced their commitment to a low-carbon future by commissioning an independent assurance report over the CO₂ emissions abatement calculation for both subject matters as disclosed on the related SCB Group's websites ⁽¹⁾, without assuming or accepting any responsibility or liability to any third parties on our part. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Management of SCB Brokers SA for our work or this report.
